

# Jlab Computer Access

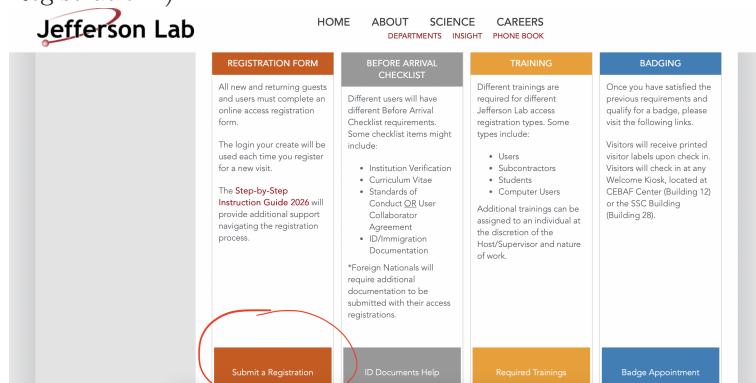

Kevin Arias

February 2026

These are instructions for creating a computer account and accessing the interactive farm at Jlab.

## 1 Creating a Jlist CUE

- Register for a guest account [here](#) (scroll down and click on "Submit a Registration")

-I recommend to use registration type "USER - UNDERGRADUATE"

- Fill out the required information (e.g. institution, dates, sponsor) and make sure you click/add the information to get a Jlab computer account. Your mentor might have to give a formal request to your sponsor to be part of a collaboration, for example; CLAS collaboration.
  - DO YOUR TRAININGS or "Required Skills"
- You should get an email with a link and more instructions to create a Jlab.org account
  - Your JLab Sponsor must electronically approve the request
  - Select a username (I think only letters are allowed)
- Following the instructions, call the Jlist help desk (757) 269-7155 and ask for your temporary password, then change it via the link from the email or [here](#). (I recommend doing this while on the call)

Dear Kevin Arias,

Your JLab **Computer** Account Request has been approved and processed. Your JLab username is karias.

Your Jefferson Lab **computer** user account has been created. Per security policy, passwords cannot be emailed.

Please contact our IT Division Help Desk at 757-269-7155 or visit CEBAF Center, F-Wing, Room 201A with a photo ID. A helpdesk staff member must verify you. Once you've been verified, they will relay your username and issue you a temporary password. Then, you must use the temporary password to reset your password as soon as possible.

In order to reset your temporary password, please follow this link: <https://jman.jlab.org/jpasswd>

- After you obtain a CUE account, contact your Hall/project [computing coordinator](#) to add you to a (POSIX) group that provides Farm access
- Download [MobilePASS+](#) , it will be your MFA for future sign-ins. You should get an email from SafeNet Authentication Service Mailer, follow the [instructions](#) to get your personal PIN. You will need this later.
  - You should now have access to [Jlab.org](#)
- If you need help, contact [scicomp@jlab.org](mailto:scicomp@jlab.org) and say you need ifarm access (mention your Hall/group) or open a [ticket](#)
- Confirm by signing into [office 365](#) and add email/account to your outlook

## 2 Farm Access

- SSH is a secure way to open a command-line session on a remote machine.

- Open a terminal and SSH into your Jlab account with your credentials with:  
ssh -Y jlab\_username@login.jlab.org  
- your password is: PIN + MobilePass one-time code (concatenate, no spaces)
- If this step succeeds, your prompt will change to something like:  
[jlab\_username@loginX ~]\$
- From the login.jlab.org shell, run:  
ssh -Y jlab\_username@ifarm  
- Here you usually enter your normal CUE password (unless you've set up SSH keys on ifarm).
- On success, the prompt becomes something like:  
[jlab\_username@ifarmXXXX ~]\$
- You are now logged into the interactive farm (ifarm) cluster.
